

# CASTHOUSE SAFETY

## W O R K S H O P

The global benchmark in safety training for the molten aluminum environment

This two-day workshop includes sessions on:

Fundamentals of Explosions  
Scrap Handling and Inspection  
Furnace Charging  
Casting Operations  
Incident Investigation

Combustible Dust Management  
Casting Pit Guarding  
Casthouse Mobile Equipment  
Protective Clothing and Equipment (PPE)

**Industry experts lead each session:** and engage directly with attendees in breakout groups

**Discuss best practices and lessons learned:** to create a safer aluminum industry overall

**Learn the latest:** research and information from the Aluminum Association and industry professionals
